Latest advances in software defined
radio technology for future wireless
communications

Francesco Raimondo,
Senior Research Associate,
University of Bristol, Bristol.

Venue:

The Egg Lecture Theatre

The Deanery CE Academy
Peglars Way,
Swindon,
SN1 7DA

Future wireless transceivers design will support multiple standards and frequencies on one platform through a flexible approach, exploiting the flexibility of Software-Defined Radio (SDR) technology. This presentation will discuss SDR's evolution, opportunities, challenges, and future directions in merging analogue and digital technology on mixed-signal chips
