

# It's not Rocket Science. Oh, wait, it is!

Speaker: Gregory Johnson, NASA Astronaut

With a wealth of experience in the Space Science arena, Gregory will highlight the significant past engineering innovations that have enabled Space Exploration. Re-counting some of his own stories from his two space flights, along with his other numerous roles within NASA, Gregory will explain what's emerging from today's technological generation and how these developments have enabled many missions- including his own!

**Friday 2nd October, 2015 at 6pm**

**Reception from 5.30pm**

**Lecture Theatre, Belfast Met at the Titanic, Belfast**
