ABB Zoom Lecture EV Charging

ABB Collaboration

EV charging is one of the hot topics of the moment with new technologies emerging all the time, both in charging and the vehicles themselves. Imminent changes to the building regulations are expected to drive a rapid increase in demand. This presentation from ABB provides a useful overview of the subject, looking at:

- Changes to building regulations
- ABB and EV charging
- Market (cars & standards)
- DC versus AC charging
- Market segments & infrastructure – choosing the correct charger
- Connectivity – Operational and Economic
