

Call for Volunteers: Join the IET Electromagnetics Committee

Are you working with or exploring Electromagnetics in engineering and technology? Interested in shaping the discussion around role across industries, influencing events, and growing your professional network? Then we'd love to hear from you. [Volunteer with the IET - Register your interest \(Page 1 of 2\)](#)

Who we are

The IET's Electromagnetics Technical Network brings together engineers, technologists, researchers and practitioners from across sectors to promote Electromagnetics and its implications in business, society and engineering, to expand the community's skills, knowledge base and diversity and explore real-world industrial experience.

Why volunteer

- Be at the forefront of Electromagnetics, helping define topics, events and conversations.
- Build your professional network across sectors and disciplines.
- Help shape a community that supports ethical, practical and innovative applications.
- Networking With a Global Community
- Opportunities to Contribute, Lead, and Volunteer
- CPD
- Knowledge Sharing
- Connection to a Global Engineering Institution

We welcome individuals with a diverse range of skills, such as those with expertise in:

- IET Member
- Electromagnetic Compatibility (EMC)
- Electrostatics
- Low(Power)/High Frequency (RF/Microwave) EM Fields
- from an academic and an industrial perspective.
- can attend our regular online committee meetings online and contribute to the ongoing development of the network.
- willing and able to contribute to and/or deliver at least one events/activities per year with the focus being online with a global reach
- bring enthusiasm, commitment, a collaborative mindset and are keen to help build and deliver high-quality content for our community.

What you'll do

As a committee member you might:

- Define and organise events: choose themes, invite speakers, help run sessions, moderate discussions.
- Contribute to content and community engagement (for example helping with writing announcements, social media, outreach).
- Work with colleagues across the IET network to promote membership, participation and new voices in Innovation Management
