Material Test Reactor Complex Decommissioning

Gordon Tait FIMechE

Lakes College
SEN (SG1) Lecture Theatre
Lillyhall Business Park, Hallwood Rd, Workington CA14 4JN

This talk will discuss the experience decommissioning the Dounreay Material Test Reactor complex which included a fuel cropping pond, a shielded cell, a high active waste store and a heavily contaminated drainage system. It will also cover the work done completing the stage 2 decommissioning of the reactor.

Brief background of the speaker - Gordon Tait is a Fellow of the IMechE and has over 40 years experience in the nuclear industry which has included power plant operation as well as decommissioning of reprocessing plant, research and analytical facilities, and a criticality complex.
