AI Empowered Renewable Energy Systems

Dr Xiandong Ma CEng FIET FHEA

More energy will be produced by decentralised renewable sources, primarily driven by the need to reduce carbon emissions and mitigate climate change. The energy systems are becoming increasingly sophisticated, requiring innovative approaches and powerful tools to enhance their management and operation. Artificial intelligence (AI) has emerged as a game-changer in the energy sector in this regard.

How do I get to the venue?

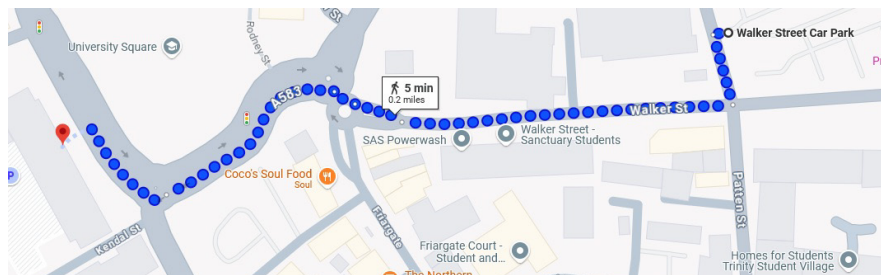

If you're coming from Marsh Lane or the university campus then it means you can't go down Corporation Street.

If you're heading from Ringway, it means you can only go up Corporation Street as far as the Heatley Street turns.

The map below shows the road layout.

Walker street car park is a 5 minute walk from EIC
(<https://maps.app.goo.gl/47Pk1zacmV796Zr49>)

The Institution of Engineering and Technology is registered as a Charity in England and Wales (No. 211014) and Scotland (No. SC038698), Futures Place, Kings Way, Stevenage, Hertfordshire, SG1 2UA, United Kingdom.
