# Compliant robotics: breaking the barriers between humans robots and environment

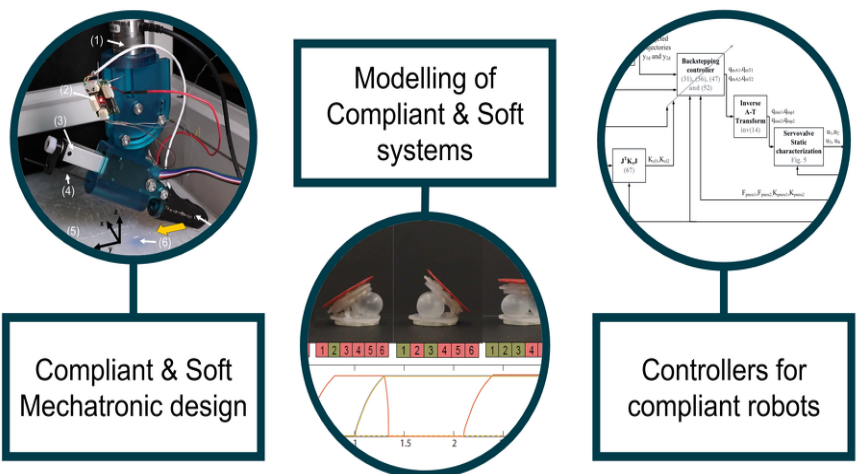

**Nicolas Herzig**

Lecturer in Mechatronics, Automation and Control  
University of Sussex

Follow our speaker on a journey around several robotics research fields and appreciate the role of compliance in addressing some challenges in human/robot or robot/environment interactions.

Nicolas will guide you through his recent research that proposes mechatronics solutions and designs to make robots more compliant.

The journey will include short excursions on the modelling and control of compliant and soft robots.
