

Advanced & Advanced Extra

Dial up your security when you need to with alarm signalling that you can upgrade on day one or down the line. So you can better protect low-to-medium and medium-to-high risk properties, no matter what happens.

What do they do?

- Both devices are monitored by experts that keep an eye on your property day and night. All year round.
- Sends signals in seconds over an IP connection. While Advanced reports connectivity issues within 30 minutes and Advanced Extra in just three.
- Stay twice as safe. Both devices combine two different technologies for extra protection. If the IP connection goes down, two 4G mobile SIMs kick in.
- Upgrade Advanced to Advanced Extra at any time to improve the security of your home or business.
- Better protect your property with enhanced signalling and end-to-end encryption at a price everyone can afford.
- Get mobile alerts when your alarm goes off and more with support from the BT Redcare app.

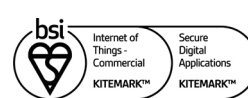

- They're made from recyclable plastic, packaged in cardboard and use little power. That's good for you, the environment – and your energy bill!

Emergency service response

Ask your installer about the benefits of an emergency service response with Advanced and Advanced Extra.

We're a partner you can trust

We have more than 35 years' experience keeping homes and businesses safe. Our Next Generation alarm signalling systems are smarter, faster and future-ready. They can protect you no matter what your budget is or the risks you face. Plus, each one comes with a 10-year guarantee.
